“ Mrs. Katie and family,

*Although we have not known you for very long, we have shared many joyous moments and happy times getting to know all of you. Dr. James was a blessings to us and many others. We will truly miss him and his thought provoking conversations. Dennis enjoyed sitting outside and discussing history and technical/engineering experiences with him. So as you bereave your love one, here is poem (author unknown) that we'd like to share to hopefully help you find a little comfort and some peace-----*

*A thousand times we needed you,  
A thousand times we cried  
If love alone could have saved you  
you never would have died  
A heart of gold stopped beating  
two shining eyes closed to rest,  
God broke our hearts to prove,  
He only takes the best.  
God knows you had to leave us,  
but you did not go alone,  
for part of us went with you,  
the day He took you home.*

*--Author Unknown*

*May God Bless All of You during this difficult time. Please know you are in our thoughts and prayers. Love, Voncille and Dennis*

“ Dear Katie & Family,  
I am very saddened to know that Dr Johnson has passed away. The one thing that we all know is that those who pass in Jesus will gain a home that can never be destroyed. I will miss him at 1st church when I come to visit. He was a wonderful man with interesting things to share. My favorite one was that he had a drug problem. When he first said it my mouth flew open until he explained what he meant. This will always remain with me because most of us had a drug problem. My prayer for you and your family is that God will sustain you and give you all that you all need. I love you and if there is anything I can do to make the load lighter just let me know. Be blessed now and always.

*We are praying for your family during this difficult time. Dr. Johnson always inspired and motivated me to continue to work with disadvantaged youth which is my passion. I enjoyed working with him this summer. I learned a lot about his Thesis that will lay the foundation for me to work with underrepresented youth in Science, Technology, Engineering, Agricultural & Math (STEAM).*
